

ADRIÁN BELMONTE

CYBERSECURITY ENGINEER

ABOUT ME

Graduated in Software Development, with experience in cybersecurity, system orchestration, network architecture design and AI. Trained by the ANTPJI to practice as a computer and forensic judicial expert. I want to develop my professional career in the field of cybersecurity, architecture and AI, in a company that allows me to achieve personal development and growth, and in which we can achieve mutual achievements.

CERTIFICATIONS

NETWORKS CERTIFIED IN CYBERSECURITY
PCCSA - PALO ALTO (SEP 2019)
COMPUTER JUDICIAL EXPERT AND
COMPUTER LAW - ANTPJI (JUN 2020)
COMPTIA NETWORK+ CERTIFICATED
N10-007 - COMPTIA (PRESENT)

WORK EXPERIENCE

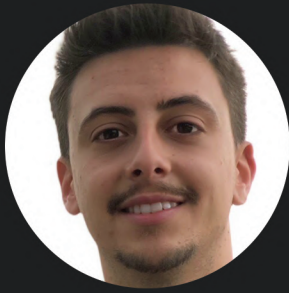

- INTERNSHIP IN DESIGN AND PAINTING @ HEINRICH SCHMID**
September 2013 - September 2014 (Bretten, Germany)
 - Chamber of Commerce Scholarship.
 - Design and painting assistant and organization of material and painting.
- EXPORT/IMPORT TRAFFIC CARGO @ ALTIUS, S.A.**
June 2016 - January 2019 (Valencia, Spain)
 - Intermediation in import and export tasks both by air, sea and customs and billing services.
- AIR SALES MANAGER @ ALTIUS, S.A.**
January 2019 - June 2022 (Madrid, Spain)
 - Team management
 - Coordination of quotes, purchases and sales related to import and export of merchandise
- CYBERSECURITY ENGINEER @ GMV**
June 2022 - Present (Madrid, Spain)
 - Project: Galileo (ESA - European Space Agency)
 - Securing and hardening of Ground Control Segment System networks.
 - Task automation and scripting-System architecture design and vulnerability management

EDUCATION

- SECONDARY / HIGH SCHOOL @ IES FUENTE SAN LUIS**
September 2010 - June 2012 (Valencia, Spain)
- ASSOCIATE DEGREE IN INTERNATIONAL BUSINESS @ IES PAX**
September 2014 - June 2016 (Valencia, Spain)
- ASSOCIATE DEGREE IN SOFTWARE DEVELOPMENT @ TEIDE**
September 2018 - June 2020 (Madrid, Spain)
- COMPUTING SCIENCE ENGINEERING DEGREE @ UOC**
September 2020 - Present

ADRIÁN BELMONTE

CYBERSECURITY ENGINEER

ACHIEVEMENTS

- Create a script that allows **obtaining a specific delta based on a vulnerability monitoring analysis** with respect to a clean template.
- **Automate processes and services through Ansible**, which allowed **reducing the manual work** of an operator by more than **70%**.
- **Work hard to get a delivery** that was late, which was successfully submitted even a couple of days **before the final date**.
- Being part of a project in which we managed to **create a system and network architecture right from the start**, to monitor possible threats in real time, through a specific program, and in which we sent the results in an understandable and simple way, to a team of people so that they could solve it, including the type of risk it could be, the possible solution and alternative, as well as its level of threat.
- **To hardening** network equipment, corporate software and operating systems, in order to secure and limit their use as much as possible, following the CIS guidelines.
- **Develop and implement its own operating system**, with specific integrated tools, along with its various update and security patches, both for Windows and Linux computers, and **for numerous satellites that are currently in the constellation**.
- Being part of the **successful deployment of Galileo 3.0**

Hello, I'm Adrián

I am passionate about computing, specifically **cybersecurity, AI and big data**. I started to be interested in it when I was 11 years old, when I started to develop C applications for video consoles, **completely self-taught** and without even knowing mathematics yet. Over time, I learned other programming languages, and I began to realize what field I wanted to dedicate my professional profile to. Today, I continue to learn and study every day because I **love learning, testing myself and always trying to improve** and exceed the goals I set for myself. I consider myself an **ambitious** person, who works in a team and with an **open and creative mind** that allows me to **adapt** to any circumstance.

COVER LETTER

Adrián Belmonte Sepúlveda
Madrid/Valencia, Spain

adrianbelmonte94@gmail.com

Dear,

I am a **hard-working** and **determined professional** looking for an opportunity to succeed at your company.

In my current role as **Cybersecurity Engineer** at GMV, I was part of a great team **to consistently meet project goals for a few days** (and sometimes even weeks) ahead of schedule, **exceeding our production quota by 7-11%**, in which, I have **personally managed to automate processes to increase work efficiency and reduce manual work by 70%**, as well as **developing** and implementing both its own operating system and the **design and creation of a network** and system **architecture** from the start.

I am confident that **my knowledge, skills, companionship and effort will allow me to deliver successful results for any company** in a variety of positions, both in **cybersecurity** and in other fields such as **AI or Big Data**, in which I may not have as much experience but as a **desire to continue learning and growing in a great company**, where we can **share professional achievements, successes and goals**, and in which I can show and give **110% of myself** so that we can to row in the same direction.

With regard to my studies, I would like to point out that **I have two Associate degree**, both in the field of economics (as a **Higher Technician in International Business**) and also in the field of computer science (as a **Higher Technician in Development of multiplatform applications**).

Currently finishing **my degree in Computer Engineering**.

These studies have shaped my personal and professional life in a positive way.

Regarding my work experience, I can tell you that **I have worked in the field of international business for more than 5 years** since it was my first job.

After making the **professional leap to the sector where I have been trained** and studied, today, I am part of a technological innovation company, where I work as a Cybersecurity Engineer **in a large project of international repercussion such as the Galileo Project of the Space Agency European (ESA)**.

I would like the opportunity to meet with you to discuss the appliance you have available. Please, let me know if you have any questions or would like to see specific work samples. You can reach me by phone at +34 697456834, or by e-mail at adrianbelmonte94@gmail.com

Thank you for your consideration.

Sincerely,
Adrián Belmonte Sepúlveda.
